TILLDASH

Scan. Pay. Go.

Revolutionizing mobile self-checkout solutions for the African retail market.

Presented by: Hillary Okello

The Problem: The Retail Checkout Crisis

Retailers lose 20–30% of customers annually due to checkout queues.

In Africa's rapidly growing retail sector, the checkout experience remains the primary bottleneck. **Half of supermarket shoppers** assess the queue before buying, and many choose to leave instead.

15+ Min

AVG. PEAK WAIT TIME

70%

STAFF TIED TO CHECKOUT

TillDash addresses this multi-billion dollar revenue loss by transforming the shopper's smartphone into a personal checkout terminal.

The Solution: TillDash

Mobile Self-Checkout for Africa.

TillDash is a cloud-based self-checkout solution that allows shoppers to **scan, pay, and go** using their smartphones. It eliminates queues and provides retailers with real-time analytics.

Pay

INSTANTLY VIA M-PESA

> TillDash is the only solution built for Africa's retail reality, combining mobile self-checkout, mobile money integration, and cloud analytics.

How It Works: Scan. Pay. Go.

A frictionless 4-step journey for the modern shopper.

TillDash Delivers Measurable ROI: Not Just a Better Experience

80% faster checkout. 70% lower staff costs. Measurable revenue recovery.

> TillDash is not a convenience feature — it is a revenue and efficiency engine. Every deployment produces three categories of measurable return:

80% Faster

SPEED

Checkout time drops by 80% compared to traditional cashier-staffed lanes, directly reducing the queue-driven abandonment that costs retailers 20–30% of potential transactions.

70% Freed

EFFICIENCY

With 70% of staff time freed from checkout duties, store teams can be redeployed to customer service, restocking, and upselling — activities that directly grow basket size.

Growth

REVENUE

Reduced cart abandonment, faster throughput, and improved customer satisfaction compound into sustained revenue growth. Retailers using TillDash recover lost customers and increase repeat visits.

Competitive Edge: TillDash Wins on Every Dimension

Zero hardware cost. 3-day setup. The only solution built for Africa's retail reality.

FEATURE	TRADITIONAL POS	SELF-CHECKOUT KIOSK	M-PESA ONLY	TILLDASH
Hardware Cost	$5,000–10,000	$15,000–25,000	None	**None**
Setup Time	2–4 weeks	2–3 months	1–2 days	**3–5 days**
Mobile Money	Sometimes	Rarely	✓ Yes	✓ **Yes**
Self-Checkout	✗ No	✓ Yes	✗ No	✓ **Yes**
Cloud-Based	Sometimes	✗ No	N/A	✓ **Yes**
Real-Time Analytics	Limited	Limited	✗ No	**Advanced**
Works Offline	✓ Yes	✓ Yes	✗ No	✓ **Yes**
Monthly Cost	$300–800	$1,000+	$0 (fees only)	**$200–500**

> TillDash is the **only solution** that combines mobile self-checkout, mobile money integration, cloud analytics, offline capability, and SaaS pricing — at a cost accessible to retailers of every size.

Sustainable Revenue Model: SaaS + Transactions

Predictable recurring revenue aligned with retailer growth.

TillDash operates a dual-revenue model that generates consistent income while ensuring our incentives are aligned with retailer success.

Monthly SaaS Subscriptions

Small Retailer 1–2 locations	**$200 / mo**
Medium Supermarket 3–10 locations	**$350 / mo**
Large Chain 10+ locations	**$500 / mo / loc**

Transaction Fees

0.5% Fee

Per mobile checkout transaction. Scales with retailer volume — the more transactions TillDash processes, the more value both parties capture. Competitive with traditional payment processing and requires no extra hardware.

Capital-Efficient: TillDash's MVP was built at $0 cost through AWS funding, enabling a lean path to profitability.

Financial Projections: Break-Even by Q1 2027, $2.8M Revenue by Q4 2028

A clear, data-driven path from pilot to profitability.

TillDash's financial model reflects disciplined growth: a near-zero MVP cost (funded by AWS), a conservative ramp through 2026, and break-even achieved in Q1 2027 as subscription and transaction revenues compound.

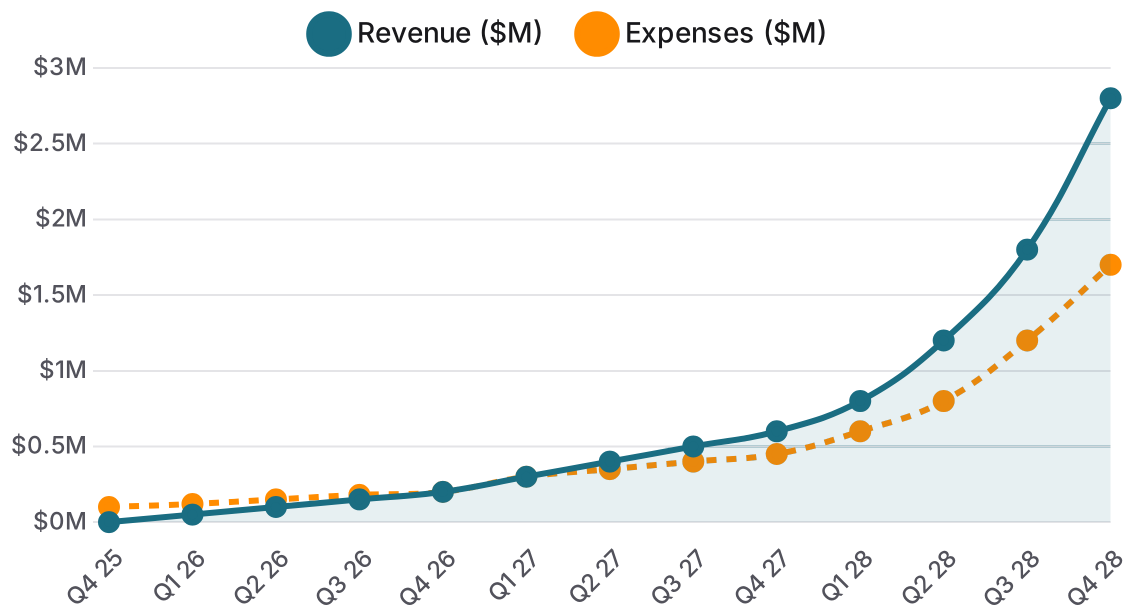
NET MARGIN AT MATURITY



> Growth accelerates from Q2 2027 as pilots convert to subscriptions; the model prioritizes capital efficiency.

Go-to-Market: Three Phases from Pilot to Pan-African Scale

A phased, low-risk strategy built on proven partnerships before broad expansion.

TillDash's go-to-market strategy is deliberately sequenced to minimize risk, build credibility, and generate compounding momentum across three phases:

Phase 1

MONTHS 1–6

Anchor Partnerships

Outreach initiated with major Kenyan chains (Naivas, Carrefour). Pilot program success creates referenceable case studies and validates the product in a live retail environment.

Phase 2

MONTHS 7–12

Market Expansion

Retailer enablement programs onboard mid-sized supermarkets. Parallel B2C acquisition campaigns drive shopper app adoption, creating network effects that make TillDash indispensable to retail partners.

Phase 3

ONGOING

Strategic Partnerships & Pan-African Scale

Ecosystem integration with banks, telcos, and FMCG brands. Expansion into Uganda, Tanzania, and Ghana using the Kenya playbook. Scaling tactics include white-label licensing and API partnerships with regional payment processors.

The Ask: Join Us in Redefining African Retail

TillDash is seeking $500K to scale from pilot to 500 locations in 3 years.

TillDash has validated the problem, built the solution at zero MVP cost, and identified a clear path to **$2.8M in annual revenue by 2028**. We are now seeking strategic investment to accelerate our go-to-market execution.

WHY NOW

Africa's retail digitization window is open. Mobile money infrastructure is mature. Smartphone penetration is accelerating. The retailers who adopt self-checkout first will define the next decade of African retail. TillDash is ready to lead that transformation.

Use of Funds

40% — **Product & Engineering**
Feature expansion, offline mode hardening, API integrations

35% — **Sales & Partnerships**
B2B sales team, pilot program execution, retailer onboarding

15% — **Operations & Compliance**
Regulatory compliance, data security, customer support

10% — **Marketing & Brand**
Shopper acquisition campaigns, brand awareness in target markets
